

**“1,179개 Node , 712개 Flow”**

The screenshot shows a web browser window with the address bar displaying "https://flows.nodered.org". The page title is "Node-RED Library". At the top, there is a header with a search bar and a "Add a flow" button. Below the header, there is a section titled "Find new nodes, share your flows and see what other people have done with Node-RED." This section includes a search bar labeled "Search library" and a "Sort by:" dropdown menu with options for "recent" (selected) and "downloads". There are also checkboxes for "flows" and "nodes", and a text label "1891 things". Below this, there is a grid of featured flows, each with a title, author, and a "flow" button. The flows are:

- Exact Synergy REST service POC** by JMHellendoorn
- Simple flow to connect listen to messages published in RabbitMQ** by Jazeem
- Simple flow that displays the location and sentiment of tweets on a world map** by hopkins
- node-red-contrib-natsio** Nats.io protocol with Node-RED
- node-red-contrib-coinbase** Some Coinbase related nodes for Node RED
- Roku Remote** by android-page

At the top of the page, there is a large image showing a Node-RED flow diagram with nodes like "node-red", "debug", "Build List", "Tweet List", "switch", and "http response".
